MR. FOSTER RETURNS

THE GENERAL DISCUSSES THE

TREATY OF SHIMONOSEKI.

He Says the Terms Imposed Are Rea-

sonable and that China Can En-

durely Pay the Indemnity.

WASHINGTON, July 8.—Ex-Secretary of

State John W. Foster arrived in Wash-

ington this morning from China, where he has

taken a conspicuous part in the diplomatic

branch of the China-Japan conflict. He is

fatigued with his long journey, but is other-

wise in vigorous health, notwithstanding the

hardships incident to the close of the

Eastern war. Mr. Foster brings a fund of in-

formation on the status of the China-Japan

struggle and interesting details of the

peace negotiations in which he took a per-

sonal part.

In answer to inquiries, Mr. Foster made

a statement in which he said that there

was good reason to expect permanent peace

between Japan and China as the result of the

treaty of Shimonoseki. The terms deman-

ded by Japan, he said, under the circum-

stances, are regarded as reasonable, espe-

cially in view of the retrocession of the

Liao Tung peninsula. The treaty has been

observed and carried out by China with

scrupulous faith. Her conduct in this

respect has created a very favorable im-

pression in Japan. The Chinese govern-

ment has been very fair in its manage-

ment of the imperial revenues. The country

has great resources and is capable of

meeting any demand that may be made

on it. The Chinese government has been

very fair in its management of the

treaty of Shimonoseki. The terms deman-

ded by Japan, he said, under the circum-

stances, are regarded as reasonable, espe-

cially in view of the retrocession of the

Liao Tung peninsula. The treaty has been

observed and carried out by China with

scrupulous faith. Her conduct in this

respect has created a very favorable im-

pression in Japan. The Chinese govern-

ment has been very fair in its manage-

asbestos packing, put on around the edges.

The plates are heated by a stream

of gas light is poured into the hollow space

between them. The carbon thrown out by

the gas is taken up by the carbon which

is thickly covered. The depth of carbon

covering can be regulated by the amount

of gas admitted. In order to secure regular

and uniform action during the process, and

to prevent the pipes that carry gas to the

hollow spaces, a special kind of carbon

is used. The carbon is made of a special

kind of coal, and is made in a special

way. The carbon is made of a special

BATTLE IN A HOLE

SPANISH TROOPS DECEIVED INTO A

NARROW MOUNTAIN PASS.

Their Slaughter Averted by a Wary

Commander and the Tables Turned

on the Insurgents.

NEARLY 300 REBELS SLAIN

AND ONLY FIFTY GOVERNMENT SOL-

DIERS KILLED AND WOUNDED.

Several Other Engagements in Which

the Cubans Were Defeated—Pro-

clamation by De Campos.

HAVANA, July 8.—An engagement has

taken place between the Spanish troops

under the command of Colonel Aznar and Gen.

Rabi, an insurgent leader, at the head of a

large force. Two hundred and eighty of

the insurgents were killed. The troops lost

fifty in killed and wounded.

It appears that Major Sanchez received

information to the effect that a force of

1,500 insurgents, under the command of

Rabi, had occupied strong positions near

Manzanillo, province of Santiago de Cuba.

Consequently, the Major sent a message

to his superior officer, Colonel Aznar, pro-

posing to the Colonel that they should join

their forces and make an attack on the in-

surgents. The messenger, however, fell into

the hands of the insurgents, who hanged

him and sent word to Major Sanchez, in

the name of Colonel Aznar, to make an

attack on the insurgent position from a

point which compelled the troops to ap-

proach through a narrow defile. Major

Sanchez, recognizing the difficulty of the

position, sent a message to
